

Repairability Sheet

Product: MAXBLAST 80L Industrial Vacuum with Floor Nozzle Attachment

Category: Industrial Vacuum Cleaner (Wet & Dry)

Repairability Index Score: 7.8 / 10

This Repairability Index indicates the ease with which the product can be repaired, based on key criteria such as disassembly, accessibility of components, availability of consumables, and required tools. The score is provided to comply with Belgian legal requirements and to support informed and sustainable purchasing decisions.

Criterion	Assessment
Disassembly	Large housing assembled using screws; non-destructive opening possible
Accessibility of Components	Motors, filters, hose, cable, and wheels accessible after opening
Spare Parts & Consumables	Cloth filter, hose, nozzle, and accessories are removable and replaceable
Tools Required	Standard household tools only
Repair Documentation	Basic instruction and safety information provided

Methodology: The score is calculated using commonly accepted EU repairability principles, considering ease of disassembly, accessibility of parts, availability of consumables, and tool requirements. The industrial design and modular components contribute positively to repairability.
