## Product name

Outdoor Extension Cable 2m

## Type number

OEC 120

## EAN-code

8718781552572

## Sub header

The extra cable to extend the distance between the control box and the lights

## Benefits

- 2 meter cable
- Suitable for outdoor use
- Extension cable for the Outdoor Spot Lights, Outdoor Pedestal Lights or the Outdoor Flex Light
- Expand up to 35m
- Suitable to connect to any 5-pin connection point

## Short description

With the outdoor extension cable, you can easily add a few meters of cable to your system. No matter how big your garden or (roof) terrace is, your smart garden lighting can cover any distance. Create more ambiance in your garden, right into the darkest corners.

## Features

### **Extra long for more atmosphere**

With a length of 2 meters you'll never be short of a piece of cable. Can only be used in combination with Innr Outdoor Smart lighting.

### **Play with light**

Combined with the Outdoor Spot Lights, Outdoor Pedestal Lights or the Outdoor Flex Light you can smartly illuminate your entire garden. With a choice of up to 16 million colours, you can easily give your garden or balcony a special touch. Great for parties and special occasions, or just if you feel like it.

### **Make it look like you're home**

With lights that turn on and off automatically, nobody can see that you're not home. A comforting thought.

## What's in the box?

2m Outdoor Extension Cable
